

EMCOR Services New York/New Jersey designs, builds, operates, and maintains commercial heating, ventilation, and air conditioning systems that help create healthy, productive, and efficient working environments.

Services include:

- » Installation, maintenance, and repair
- » System upgrades and retrofits
- » Design-build
- » Energy efficiency programs
- » Monitoring and control
- » Preventive and predictive maintenance
- » Indoor environmental quality solutions
- » 24/7/365 emergency response

Cooling Optimized for the Most Critical Environments

In today's technology-rich business world, more and more buildings require precise, stable, humidity-controlled conditions. From large-scale data centers and technology rooms, to server rooms, clean rooms, and hospitals, EMCOR Services New York/New Jersey has extensive expertise providing cooling systems for the most critical environments.

Whether it's a raised floor solution, calibrated vectored cooling, or more traditional computer room air handlers, we're experienced with a wide array of cutting-edge technology.

Achieve Precise Environmental Conditions with Precision Cooling

Sensitive electronics and other advanced equipment often require environmental conditions that standard air conditioning can't deliver. We provide precision air conditioning systems as an alternative. Precision cooling offers exacting humidity and temperature control and can even help improve energy efficiency by reducing equipment strain, malfunctions, and overheating.

Expertise in a Range of Facilities

Our experts are familiar with a variety of environments that require precision cooling, including:

- » Data centers
- » Server rooms
- » Network closets
- » Network operations centers
- » Telecom areas
- » Printer/copier/CAD centers
- » Medical equipment suites
- » Clean rooms
- » Hospital facilities

Critical Care for Critical Environments

We understand the intense demands that critical environments face. That's why we provide repair and maintenance services that help cooling systems operate reliably long after installation is complete. And, because EMCOR Services New York/New Jersey is manufacturer-independent, our technicians are trained and qualified to support systems of all types, providing objective consultation regardless of make and model.

- » **Rapid Response:** With a regional footprint, we can open supply houses and dispatch immediately from a large fleet of well-equipped vehicles.
- » **24/7 Service:** We offer 24-hour live response and service, as well as options for dedicated phone lines and customized account management.
- » **Certified Technicians:** Our highly trained technicians carry top manufacturer certifications. Plus, we back them with over 44 years of industry experience.
